SPEED

Study of November 1959 reveals that all urgent requests were machined on same day of request, where so specified by requestor. Sample of 15 routine requests showed 2 days as maximum service time.

* Does not include distribution of copies of Report Titles Index

** Does not include input to special projects, which during the past year averaged 29,400 cards per quarter (9,000 - 43,300)

*** Does not include input to special projects
